

" ARTHIQS Outcomes"

Candide FONT-SALA

ARTHIQS

ART and HSC Improvements for Quality and Safety throughout Europe

ARTHIQS should bring solutions to some current issues related to the EUTDC implementation: notably by strengthening institutional competencies , reinforcing quality and safety requirements

- A trained ART dedicated CA/ Delegated body
- Recommendations for the set-up of a HSC donors follow-up registry as a basis for the development of a registry/data base or for upgrading an existing one (minimal/optimal data set & organisational structure)
- ART & CBB inspection guidance (vade-mecum & curriculum): common EU good practices, & CA/ delegated body(ies) shall have tools to assess compliance with guidelines
- Surveys will also bring valuable information : knowledge EU ART landscape (regulation & practices) , awareness on professionals needs regarding organisation and regulation; and on HSC regarding existing registries, data collected and practices
- Sustainability will notably be ensured by face-to-face trainings

 ARTHIQS targets institutional and organisational levels: better regulation & harmonisation of practices, but also to ensure the security and safety of donors and recipients/beneficiaries.
